BRAND IDENTITY SYSTEM

Arjun Automation

Precision Orbit · Version 1.0

Enterprise automation, orchestrated.

Official brand book · Logo · Color · Type · Usage

1. Brand Strategy

Mission

Give every organization an enterprise operating system — AI-native, secure by default, and fast to value — so teams run strategy while automation runs the work.

Vision

A durable standard for how modern companies operate: one platform, clear outcomes, continuous intelligence.

Values

- Outcome over output — Measure client results, not activity volume.
- Platform thinking — Configure once; scale without bespoke debt.
- Security first — Tenant isolation, auditability, governance.
- Radical clarity — Plain language, honest timelines.
- Partnership — Success measured after go-live.

Voice: Precise · Calm · Confident · Human · Evidence-led

Personality: Intelligent · Premium · Trustworthy · Timeless · Operational · Minimal

Tagline: Enterprise automation, orchestrated.

2. Logo System — Orbit Mark

The Orbit Mark combines an ascending A geometry with a signal-teal orbital arc. It reads as precision, motion, and continuous operation — suitable for SaaS, AI, and enterprise buyers.

Variants

- Primary horizontal (light / dark)
- Primary stacked (light / dark)
- Secondary horizontal wordmark
- Monogram / icon (light / dark)
- App icon + favicon

Clear space: equal to the height of the Orbit Mark letter cap.

Minimum size: horizontal 128px digital / 35mm print; monogram 24px / 8mm.

Do

- Use approved SVG/PNG masters from the Asset Export Pack
- Prefer light logos on mist/cloud; dark logos on ink
- Keep clear space free of type, photos, and UI chrome

Don't

- Recolor outside ink / signal / white
- Stretch, rotate, outline, or add drop shadows
- Place on busy photography without a dark scrim
- Rebuild the wordmark in non-brand typefaces

3. Design System

Official color palette

Ink	Harbor	Signal	Signal Bright	Mist	Cloud	Steel
#0A1628	#0E4D5C	#0F766E	#14B8A6	#F1F5F9	#F8FAFC	#64748B

Typography: Geist Sans (display/body), Geist Mono (code).

Scale: Display 3rem !’ Label 0.75rem. Tracking tight on display (" 0.03em).

Grid & spacing: 4px base unit · 12-column content · max width 72rem.

Iconography: geometric arcs and nodes; 1.5–2.5px strokes at 24px; limited palette; no skeuomorphism.

Illustration: systems diagrams with soft depth — arcs, nodes, orbit motifs. Avoid purple-default gradients and generic stock collage.

4. Digital Assets

- Favicon (SVG + 16/32/64 PNG)
- App icon (1024 PNG)
- Social profile avatar + LinkedIn banner
- Email signature HTML template
- Presentation title + content slide templates

5. Governance

All product, marketing, partner, and sales materials must use Brand Identity v1.0 assets from brand-assets/identity-v1.0. Do not invent alternate marks or palettes.
